THE HISTORY OF THE  
CITY OF NEW YORK

The history of the city of New York, from its first settlement by the Dutch in 1624, to the present time, is a subject of great interest and importance. It is a city of great size and power, and its history is full of interesting events and incidents. The city was first settled by the Dutch, who called it New Amsterdam. It was later taken over by the English, who renamed it New York. The city has since been a center of commerce and industry, and its history is a testament to the power and influence of the United States.

The city of New York has a long and rich history, and its development has been a remarkable one. From a small settlement of Dutch traders, it has grown into a major world city, and its history is a testament to the power and influence of the United States. The city has been a center of commerce and industry, and its history is full of interesting events and incidents. The city has been a center of culture and education, and its history is a testament to the power and influence of the United States.

TO BE COMPLETED BY PHYSICIAN: MEDICAL CERTIFICATION

DIVISION OF VITAL RECORDS, P.O. BOX 68760, BALTIMORE, MARYLAND 21215-0020

TO THE HOSPITAL OR ATTENDING PHYSICIAN: The law requires that the death certificate be executed within 24 hours after death. Page 6 may be retained by the hospital or attending physician.

TO THE FUNERAL DIRECTOR: After this certificate has been signed by the attending physician and completely filled in by the funeral director, page 5 should be detached for use as the burial-transit permit. Pages 1, 2, 3 should be filed within 72 hours after death with the State Dept. of Health and Mental Hygiene prior to burial, cremation, or removal.

IMPORTANT: If item 28 is marked, or item 23 shows any injury, or other traumatic event, the medical examiner must be notified at once.

The first part of the paper is devoted to a discussion of the  
 general principles of the theory of the structure of the  
 crystal lattice. It is shown that the structure of the  
 crystal lattice is determined by the balance of the  
 forces of attraction and repulsion between the atoms.  
 The forces of attraction are due to the electrostatic  
 interaction between the positive and negative ions, while  
 the forces of repulsion are due to the overlap of the  
 electron shells of the atoms. The balance of these  
 forces determines the equilibrium distance between the  
 atoms, which is the lattice constant.

In the second part of the paper, the properties of the  
 crystal lattice are discussed. It is shown that the  
 properties of the crystal lattice are determined by the  
 structure of the crystal lattice. The properties of the  
 crystal lattice include the density, the refractive index,  
 the thermal expansion coefficient, and the electrical  
 conductivity. The properties of the crystal lattice are  
 determined by the balance of the forces of attraction  
 and repulsion between the atoms, which determines the  
 equilibrium distance between the atoms.
